Volume Control Dampers. Your duct system needs to have a way to adjust the airflow volume to different sections of the ducting unit. Volume control dampers help with this function and can be automatic or manual. Automatic control in a simple system is provided by zone dampers while the VAR (variable air volume)

To gain more control of over-the-top indoor comfort costs, one of the simplest changes is to have your licensed, professional HVAC dealer install and program a programmable thermostat or control system. With the latest in thermostats and control systems, you get indoor comfort when you want it and save money when you aren't in your home. And that's nothing to feel guilty about!

### **HVAC Systems Duct Design - SMACNA**

Additional control requirements may come into play if the equipment serves a smoke control function. HVAC equipment or features that are required by code must be identified early in the design process. This is one of the reasons it makes sense to develop the controls sequence early in the design process. Doing so

Ducts are conduits or passages used in heating, ventilation, and air conditioning (HVAC) to deliver and remove air. The needed airflows include, for example, supply air, return air, and exhaust air. Ducts commonly also deliver ventilation air as part of the supply air. As such, air ducts are one method of ensuring acceptable indoor air quality as well as thermal comfort.
